Technical skills

Programming: Python, Java, JavaScript, C# ,C++ | **Web:** HTML, CSS, React
Systems: Linux, Ubuntu, Windows | **Tools:** Git, GitHub, Nginx, SQL, Unity, SteamCMD, Qt

Education

Bachelor of Science in Computer Science
Memorial University of Newfoundland | St. John's, NL | 2022 - Spring 2028
Concentrations: Artificial Intelligence, Visual Computing and Games

Related activities

MUN Computer Science Society - Executive | St. John's, NL | Jan 2026 - Present
CS society is a club for any CS major to gain insight in courses and subjects with help from other alumni and majors, we also host events such as hackathons and mixers to help encourage members to meet new people and build their skills.
FormulaMUN - Software Team Member | St. John's, NL | Apr 2026 - Present
FormulaMUN is a team of engineers and a few computer scientists working together to make an electric car to compete in FormulaSAE competitions. I am working as a software engineer to help develop the dash and telemetry systems for an electric FormulaSAE car as well as helping with any electrical systems that I can.

Projects

FormulaMUN

FormulaSAE Dashboard | Spring 2026 - Present
Developing a Qt/QML dashboard for the FormulaMUN electric vehicle to display vehicle data and driver information.
Built a testing interface and reusable modules to support future vehicle integration and development.
FormulaSAE Telemetry | Spring 2026 - Present
Developing software to collect, process, and display live vehicle data from the CAN system.
Working with Python-based data handling and dashboard integration for real-time monitoring.

Personal

Linux Server & Hosting | Winter 2025 - Present
Configured and maintained an Ubuntu server for websites, applications, and dedicated game servers.
Managed Nginx, DNS, SSL certificates, port forwarding, SteamCMD, and AMP.
Web Portfolio | 2026 - Present
Built a personal portfolio using React, JavaScript, HTML, and CSS.
Created reusable components and deployed the application using Nginx.

Academic

Blokus Board Game Project | Winter 2026
Implemented CPU players, difficulty levels, game logic, and accessibility features.
Collaborated using GitHub for version control and iterative development.
A* Search & AI | Winter 2026
Implemented A* pathfinding using priority queues, open/closed lists, and heuristics.
Evaluated heuristic approaches for different movement costs and search strategies.

Work experience

Crew Lead / Materials Manager - NL Student Painting | Paradise, NL | Apr 2026 - Aug 2026
• Coordinated with coworkers to complete painting projects and daily tasks efficiently.
Overnight Freight Worker - Home Depot | Paradise, NL | Summers 2024 & 2025
• Maintained store organization, cleanliness, and safety standards
